## Count

### Frequencies for each level of the variable

Table of the counts at each combination of factor levels (categorical variables).

```
table(array)
```

```
x <- c('Yes', 'Yes', 'No', 'None', 'Yes', 'No', 'No', 'Yes', 'Yes', 'Yes')
table(x)
```

```
## x
##   No None  Yes
##    3    1    6
```

sorted

```
x <- c('Yes', 'Yes', 'No', 'None', 'Yes', 'No', 'No', 'Yes', 'Yes', 'Yes')
table_x <- table(x)
table_x[order(table_x)]
```

```
## x
## None   No  Yes
##    1    3    6
```
